### IMPACT COMPARISONS

- Air Transportation  
**\$16.6 Billion**
- Hotels and Motels  
**\$14 Billion**

- Accounting  
**\$10 Billion**
- Electric Power Distribution  
**\$10 Billion**

Source: Argentum engaged Tripp Umbach to measure the economic, employment, government revenue, industry, and social responsibility impacts of senior living communities at the national level and in each state. For the purposes of this study, "senior living" is defined as independent living, assisted living, memory care, and continuing care retirement communities. Skilled nursing facilities are not factored into the calculations. Economic and employment impact measures dollars and jobs generated within the region because of senior living communities. This includes spending on goods and services with a variety of suppliers within the state and their employees, spending of staff and visitors, and business volume and jobs generated by businesses within the region that benefit from senior living's spending. Data sources included Tripp Umbach internal data, IMPLAN datasets, National Center for Health Statistics, U.S. Census Bureau, and AARP. Impacts were formulated using IMPLAN software. IMPLAN data and accounts closely follow the accounting conventions used in the "Input/Output Study of the U.S. Economy" by the U.S. Bureau of Economic Analysis and the rectangular format recommended by the United Nations. Publication was made possible through MatrixCare.
